

The Benefits of Fibre ProTector

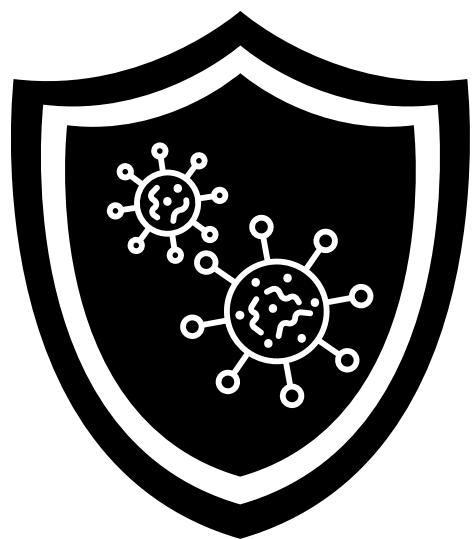

Stain & Soil Protection

- Prevents staining from accidental spills by forming a barrier around each fiber
- Provides increased cleanability in the event a spill does breach the barrier.
- Reduces wear and tear, prolonging the life of your upholstery, carpets and area rugs.
- Reduces the interval needed for deep cleaning of your items.

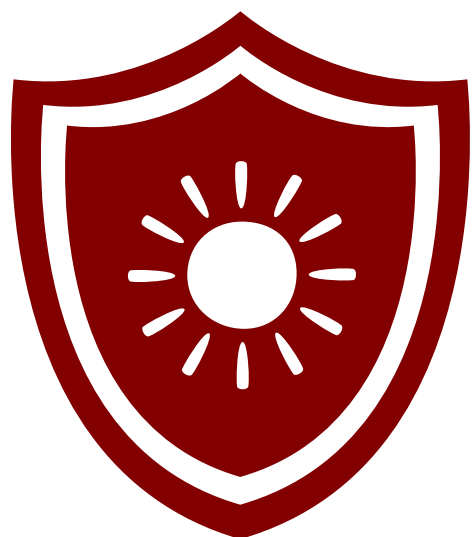

Environmentally Friendly

- Fiber ProTector is completely harmless to humans, animals and the environment.
- Non-Toxic, Non-Allergetic, Biodegradable
- There are no perfluorooctanoic acid (PFOA), perfluorooctanesulfonic acid (PFOS), or volatile organic compounds (VOC) in Fiber ProTector.

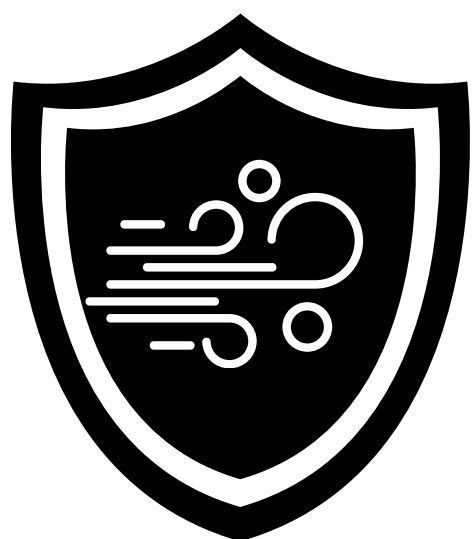

Bacteria Protection

- Incorporates antimicrobial technology and is bacteriostatic, which prevents the development and spread of bacteria, germs, fungus and mold.
- Nano-tech particles create an invisible shield around each fiber – shielding against organic fluids, soil, and dust.

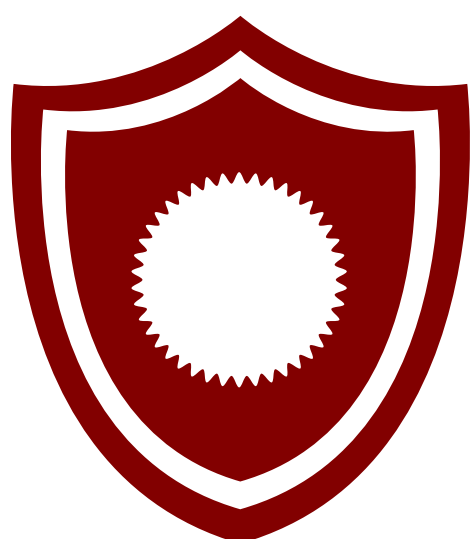

UV Protection

- Helps protect against UV sun-fading and discolouration, keeping your colours vibrant and looking new for longer.
- Reduces wear and tear from sun damage which prolongs the life of your furnishings.
- Ideal for outdoor furniture or indoor furniture that sits in direct sunlight.

Improved Indoor Air Quality

- Soil, bacteria, mold or mildew trapped in carpets and upholstery are the primary cause of indoor air quality issues. Since these items can't adhere to fibers that have been treated with Fiber ProTector, they are easily removed with regular vacuuming.
- Application is especially recommended for those with allergies or asthma.

EnviroSeal Certified

- EnviroSeal® certification is a crucial independent confirmation of a cleaning product's environmental credentials: performance, safety and suitability-for-purpose.
- Fiber ProTector is the ONLY protection product on the planet to earn this certification
